- ✓ 3,000+ solar installations
- ✓ Bay Area's solar battery storage experts
- ✓ NABCEP-certified installers
- ✓ 25-year solar panel warranty

HOME SOLAR BENEFITS LAST FOR DECADES

Home Solar / Napa, CA

LONG-TERM SMART INVESTMENT

Solar panels give homeowners a reliable and affordable renewable alternative to expensive and volatile fossil fuel-generated electricity.

PROTECTION AGAINST BLACKOUTS

When solar panels are paired with home battery storage, solar panels make homes more energy resilient by mitigating power outages.

REDUCED CARBON EMISSIONS

Residential solar systems offset carbon emissions from fossil fuel power plants, lower your carbon footprint, and help create a clean energy future.

Solar also increases the value of your home!

GETTING READY FOR A HOME SOLAR INSTALLATION

Homeowners can expedite the solar installation process by collecting electricity bills from the past 12 months, confirming the age of their roof, locating paperwork for any electrical work, and knowing their goals for going solar.

STEPS FOR GOING SOLAR

Home Solar | Oakland, CA

- 1 Schedule a free solar consultation and site evaluation.
- 2 We will schedule installation to meet your needs.
- 3 Sign our agreement and return it with a deposit.
- 4 We will obtain permits and order equipment.
- 5 We will install the solar panels and/or battery system.
- 6 The utility company will connect the system to the grid and we will inspect it.

TAKE ADVANTAGE OF SOLAR INCENTIVES & FINANCING

Homeowners can get help managing the upfront cost of installing solar panels in the Bay Area with solar incentives and financing.

Sun Light & Power helps homeowners understand the solar incentives and financing options available to them. We help you assess the long-term financial feasibility of adding solar panels and/or battery storage to your California home.

The most lucrative incentive currently available to homeowners is the solar federal income tax credit (ITC). This incentive **allows homeowners to claim a tax credit worth 30%** (through 2032) of their solar installation's total cost. Additional California solar incentives include property tax exemptions, and, the Self-Generation Incentive Program (SGIP).

Sun Light & Power helps homeowners take advantage of as many incentives as possible!

PEACE OF MIND

WARRANTY

Every residential solar system we install comes standard with a 10-year limited workmanship warranty. Manufacturer warranties protect your solar panels for *up to 25 years* excluding labor charges.

For customers who have a SolarEdge inverter as part of their system, they will be able to access continuous, real-time system monitoring via the SolarEdge app.
